Summary of Our Conversation

New Courses – 1st Trimester SY 2026■2027

	Days and Time
ject■2	Tuesday, Thursday, Saturday 4:50■pm■–■6:10■pm
Capstone Project■2	Tuesday, Thursday, Saturday 4:50■pm■–■6:10■pm
uter Interaction	Monday, Wednesday, Friday 6:10■pm■–■7:30■pm
Computer Programming	Tuesday, Thursday, Saturday 2:10■pm■–■3:30■pm (M305) ; Tuesday, Thursday, Saturday 3:30■pm■–■4:5
of Drawing	Monday, Wednesday, Friday 6:10■pm■–■7:30■pm (S237) ; Tuesday, Thursday, Saturday 6:10■pm■–■7:30
etworks	Tuesday, Thursday, Saturday, Sunday 7:30■pm■–■8:50■pm (M305) ; Tuesday, Thursday, Saturday 8:50■p
ject■2	Monday, Wednesday, Friday 12:50■pm■–■2:10■pm
g■1	Tuesday, Thursday, Saturday 4:50■pm■–■6:10■pm

Students who submitted the Universal Enrollment Form and have no schedule conflicts are already enrolled or have a reservation. Those with conflicts or overloads should reserve subjects or visit the CITCS office for add■drop assistance.

Meaning of

is an HTML tag that inserts a line break, causing the following content to start on a new line in a web page.

Overview of the Developer Portfolio Image

The image is a digital personal portfolio designed to look like a code■editor window with a dark theme. It uses HTML■style tags (`, , etc.) and shows line numbers on the left. The layout includes:
Header with the developer's role (Developer), name (Edezie Agaled), taglines, contact information, and call■to■action buttons for downloading a CV and visiting GitHub.
Terminal box showing a simulated command line that answers the command $ whoami with "Problem Solver," "Builder," "Optimizer," and "Lifelong Learner."
Tech Stack grid listing languages and tools such as HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Git, and Tailwind CSS.
Activities section titled "Actively Building" with items: Web Apps, APIs, Automation, Solutions.
Projects section titled "Recent Work" describing three projects: TaskFlow (productivity app, Next.js, Tailwind, MongoDB), DevMetrics (analytics dashboard, React, Node.js, Express, PostgreSQL), and ShopEase API (e■commerce RESTful API, Node.js, Express, MongoDB) and a link to the GitHub repository.
Approach section with steps: Understand, Plan, Build, Refine.
Core Values section listing Discipline, Consistency, Curiosity, Ownership, Impact.
Footer with a quote about code and impact and a "Let's Connect" button linking to the developer's email.

The overall aesthetic mimics a code editor with a monospaced font, high■contrast dark background, and neon■green syntax highlighting.

Description of the Binary Code Portrait

The second image is a digital portrait created entirely from the digits 0 and 1 arranged in a uniform grid. The background is black, while the digits appear in bright neon green, giving a “Matrix■style” appearance. The face and shoulders are formed by varying the density and brightness of the digits: Brighter, densely packed digits highlight the forehead, bridge of the nose, and other illuminated areas. Sparser or darker areas represent shadows around the eyes, sides of the nose, under the chin, and hair.
No other text or symbols are present; the binary digits themselves provide the shading and form.

What “TJS” Might Refer To

“TJS” can have several common meanings in technology and other fields. The most frequent interpretations are:
TypeScript JSX – the file extension .tsx` is sometimes informally referred to as TJS when discussing TypeScript files that contain JSX syntax.
Tajikistani Somoni – the currency code for the Tajikistan somoni.
TJS – abbreviation for “The JavaScript” in informal contexts, though not a standard term.
TJS – a library or framework name, such as “TJS” (Tiny JavaScript), used for lightweight scripting.

If you have a specific context where “TJS” appears, please provide that and I can give a more precise definition.
