Binary Code Portrait Summary

The image is a portrait of a person from the shoulders up created entirely from the digits 0 and 1 arranged in a dense grid.
The background is black and the digits appear in bright neon green, giving a high■contrast, matrix■style aesthetic.
Shading is achieved by varying the density and brightness of the digits: the forehead, bridge of the nose and other highlights are formed by tightly packed bright digits, while shadows on the eyes, sides of the nose, under the chin and hair are represented by sparser or darker areas where the black background shows through. The overall effect resembles digital ASCII art with a cyber■punk look.

Newly Opened Courses – 1st Trimester SY 2026■2027

	Days & Time
ect■2	Tuesday, Thursday, Saturday 4:50■pm■–■6:10■pm
Capstone Project■2	Tuesday, Thursday, Saturday 4:50■pm■–■6:10■pm
ter Interaction	Monday, Wednesday, Friday 6:10■pm■–■7:30■pm
