Global Tree Species and Geographic Distribution

A comprehensive catalog of prominent tree species worldwide, detailing their scientific names, typical growing environments, and the primary countries where they occur most abundantly.

Common Tree Name	Scientific Name	Primary Habitat / Biome	Predominant Country / Region
Coast Redwood	Sequoia sempervirens	Coastal temperate rainforest	United States (California, Oregon)
Giant Baobab	Adansonia grandidieri	Tropical dry deciduous forest	Madagascar
Cherry Blossom (Sakura)	Prunus serrulata	Temperate mountain valleys and lowlands	Japan
Blue Gum Eucalyptus	Eucalyptus globulus	Coastal open forests and woodlands	Australia (Tasmania, Victoria)
Teak	Tectona grandis	Tropical mixed hardwood forest	Myanmar, India, Thailand
Norway Spruce	Picea abies	Boreal forest and alpine regions	Norway, Sweden, Finland
Olive Tree	Olea europaea	Mediterranean scrub and coastal hills	Spain, Italy, Greece
Brazil Nut Tree	Bertholletia excelsa	Non-flooded Amazonian lowland rainforest	Brazil, Bolivia, Peru
Cedar of Lebanon	Cedrus libani	Mountainous terrain (1,000–2,000 m)	Lebanon
Dragon’s Blood Tree	Dracaena cinnabari	Semi-desert limestone plateaus	Yemen (Socotra Archipelago)
Argan Tree	Argania spinosa	Arid and semi-arid calcareous soils	Morocco
Scots Pine	Pinus sylvestris	Taiga, boreal forests, and peatlands	Russia, Sweden, Finland
Sugar Maple	Acer saccharum	Mixed deciduous northern hardwood forests	Canada, United States
Ginkgo Biloba	Ginkgo biloba	Temperate valley deciduous forests	China (Zhejiang, Guizhou)
Monkey Puzzle Tree	Araucaria araucana	Volcanic slopes and Andean temperate forests	Chile, Argentina
